# PRODUCTS

Franklin Howard International provides high quality drilling equipment and spare parts from top manufacturers in the United States. Warranty and after sales technical support is available on all products.

## Capital Drilling Equipment

- Blowout Preventers
- BOP Control Systems
- BOP Test Units
- Choke & Kill Manifolds
- Drilling Mud Motors
- Solids Control Equipment
- Power Generation Equipment
- Well Stimulation Equipment
- SCR Systems

## Complete Rig Packages

- Mast & Substructure
- Top Drives
- Drawworks
- Mud Pumps
- Travelling Equipment
- Rotary Swivels
- Rotary Tables
- Torque Converters

## Pipe Handling Equipment

- Spinning Wrenches
- Air, Hydraulic and Manual Slips
- Kelly Spinners
- Make-Up/Break-Out Systems
- Elevators
- Tongs
- Links
- Safety Clamps

## Specialist Equipment

- Fishing Tools
- Heavy Duty Material Handling Equipment
- Anti-Slip Matting and Ancillary Products
- Hydraulic Power Units
- Flowline Equipment
- Thread Compounds
- Relocatable Camps and Portable Housing
- Air Winches

## Spares & Ancillary Items

- Drawworks spares
- Mud pump spares
- Travelling equipment spares
- Rotary swivel spares
- Kelly valves, IBOP valves and safety valves
- Centrifugal pumps and packages with electric motor/engine drive
- Master bushings, casing bushing, Kelly bushings, insert bowls and spares
- Shaker screens for various shale shaker manufacturers
- Float valves and Relief valves and spares
- Rotary and vibrator hoses
- Ring joint gaskets

# SERVICES

## Spare Parts Management, Procurement & Inspection

FHI specializes in Oil & Gas spare parts management, procurement, and inspection management, providing customized solutions to meet each of our client's specific requirements. All of our products are engineered and manufactured to the highest standards demanded by the Oil & Gas industry.

## Oil & Gas Transportation- Logistics

FHI provides global logistical support optimizing delivery time and minimizing transportation costs. We choose the fastest, safest and most economical means to deliver payloads to the desired destination. Whether via air or ocean freight, we rise to the challenges of meeting and exceeding our clients' expectations.

## Offshore Installation Contracting

FHI provides turnkey contracting services for the upstream sector. We execute installation, construction, maintenance, commissioning, and decommissioning contracts on time and within budget under controlled risk management processes. Our Offshore Installation contracting services typically include:

- Field Infrastructure layout review for installation of field infrastructure assets
- Generating installation schedules and performing front-end planning
- Generating budgets and cost scenarios for all Marine/Subsea related activities
- Complete all installation documentation and certification in line with industry standards

## Minimum Facilities & Wellhead Tower Installations

FHI provides full Project Management and Offshore installation services for light construction requirements. We engage in Minimum Facilities or Wellhead Platform design, engineering, and installations as well as FPSO OR FSO installations and re-locations.

## Client Support Consulting

FHI provides full project management services and/or operating support as consultants for specific project management elements, including but not limited to:

- Engineering and Procedures
- Equipment Operations Procedures
- Logistics planning and coordination support
- Vendor Inspection
- Cost and schedule control
- Risk Analysis and Risk Management
- Offshore Installation Contracting
- Installation FEED Engineering
- Marine Construction support
- Equipment design and procurement
- QHSE Management and onsite supervision
- Assisting with approvals of Field infrastructure
- Completing documentation and certification
- Contract and subcontract management

### Inspection, Repair & Maintenance (IRM)

We provide inspection, repair, and maintenance services for new and established offshore assets. Our IRM operations include:

- Platform inspections
- Subsea infrastructure
- Inspection and replacement
- Pipelines inspections and repairs
- Well site surveys and inspections
- Control hose assembly repair and replacement
- Diving inspection services
- ROV inspection services

### Commissioning

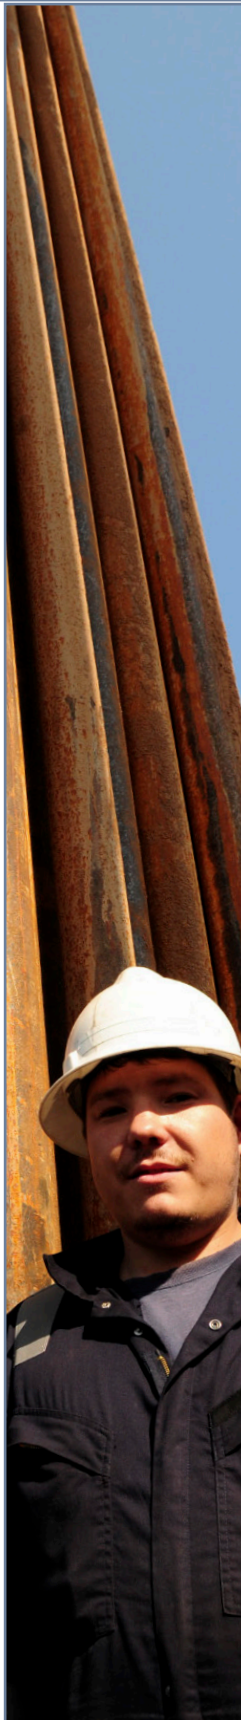

Our wealth of experience in commissioning projects globally includes the following commissioning services:

- Development of Commissioning Philosophy
- Contract review
- Commissioning Schedule development
- Commissioning Procedure creation/development
- QHSE review and procedure development
- Work Package Management
- Schedule Tracking
- Documentation Control
- Provision of Manpower
- Certification, Integration and Handover

### Subsea Decommissioning

FHI's approach to decommissioning is providing overall support to our clients in removing their valuable assets based on their requirements. Our subsea infrastructure decommissioning operations cover all aspects of Subsea Infrastructure Removal as well as Suspended Well Abandonment services.
